

FOOD FOR THOUGHT

And the Lord formed man of the dust of the ground, and breathed into his nostrils the breath of life; and man became a living soul. (Genesis 2:7)

One of the challenges in the field of science in this 21st century is to be able to clone humans. It's very interesting that man has always sought to duplicate the sovereign acts of God.

God himself made us from the dust of the earth and breathed into our nostrils the breath of life and we became living "souls." Soul is the key word. We are created after the triune nature of God, i.e., body, soul and Spirit. No matter what "human like" images are made by man, no mere man is able to create a soul. Robots perhaps, but not souls.

Modern technology is wonderful and we have come a long way, but we will never be able to exceed the acts of God. God stands alone in his omnipotence and no robot, no computer, no mere man, can compare to the awesomeness of God.
